BEAUTY OF LIVERMORE

Oriental Poppies

These vivid colored flowers are becoming more popular every year. Considering their ease of culture, dependability for producing fine, large flowers, their hardiness, and ability to thrive in all soils, they give large dividends for the effort and time required to care for them.

Colors range from pure white through many shades of orange, pink, and red to almost purple.

We offer a nice list of very distinct colors, and we believe you will be pleased with the results you get from our plants. See back of this page for complete list of varieties and special offers.

OLYMPIA

Olympia

Double salmon. Ten days earlier than all others, and very prolific bloomers. Very hardy and dependable. Olympia are beautiful in mass planting and their full double flowers make a beautiful effect. Twenty-four to thirty inches tall. Fine roots that should bloom next year. **35c each; 3 for 80c; 6 for $1.40; 12 for $2.75, postpaid.**

Beauty of Livermore

Large, brilliant red flowers on tall stems make this variety outstanding and beautiful. 42 to 48 inches tall. Very hardy and dependable. Fine for mass planting, and a beautiful variety for cut flowers. **35c each; 3 for 80c; 12 for $3.00, postpaid.**

Poppies in the Garden

These beautiful exotic flowers are a source of pride and satisfaction to all who possess them. Plant some pink varieties such as Fairy, Perfection, or Mrs. Perry along with Delphinium and Madonna Lily. Plant some dark red varieties with evergreens or "Mock Orange" or other dark green shrubbery for background.

When to Plant Oriental Poppies

We have found August to November to be the best time to transplant Poppies, and once they are established, the clumps increase in size and produce more blooms. They may be left undisturbed in the same place for years.

Poppies Grow Everywhere

We have shipped these fine plants to Alaska, Hawaii, Mexico, Bermuda, Canada, Newfoundland and practically every state in the United States. We pack them so they will reach you in prime condition, and they are well worth trying in your garden.

(1) **SASS PINK.** Large light pink with pleated petals. **50c each.**

(2) **PERRY'S WHITE.** Glistening white with mulberry base.

(3) **DELICATA.** Rich wine-color. Does best in shade or partial shade.

(4) **LULU A. NEELEY.** An outstanding oxblood-red. Very fine.

See next page for complete prices and descriptions.

THE HARMON NURSERY - Prospect, Ohio

A Word about our POPPIES.....

THE plants we sell are grown from root divisions and are two-year-old field-grown plants. They generally bloom the first year after planting and are very much superior to common seedlings usually sold.

We guarantee them to be true to name and color.

Complete cultural directions are sent with each order. Poppies like a well-drained soil but they are not particular whether it is clay, sandy, limestone or acid. Leaf mold, **well-rotted** cow manure and bone meal seem to be the best fertilizers.

When Tops Die Down in Summer

Usually in late June and July the tops of Poppies die, and they go into a rest period. In August and September they start a new growth which remains all winter. So do not be alarmed when the tops die down in early summer, as this is natural and your plants are just taking a rest.

How to Prepare Oriental Poppies for Bouquets

The newly opened flowers or buds showing color are the ones to cut. Burn the ends of the stems over a fire until charred an inch or two. Place in a deep vase of cold water and keep in a cool, dark location for two hours. After this they may be arranged in bouquets and will keep a long time if kept in fresh, cool water.

SPECIAL OFFER

SPECIAL COLLECTION: **One of each variety marked with a star (*), 7 fine varieties, postpaid for $1.75. A fine selection of colors. All different.**

FINE CUT FLOWERS FOR DECORATION DAY
